PROFESSIONAL SUMMARY

MCA graduate from RV College of Engineering (CGPA 7.90, First Class with Distinction) with hands-on experience across full-stack development, machine learning, and data analytics. Skilled in building end-to-end systems, from ML-driven platforms to full-stack web and mobile applications. Proficient in Java, Python, SQL, React, and Node.js. Seeking an entry-level role in software development, data analytics, or business intelligence.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

RV College of Engineering, Bengaluru (VTU) | CGPA: 7.90 / 10 | First Class with Distinction

Bachelor of Computer Applications (BCA)

2021 – 2024

M.S. Ramaiah College of Arts, Science & Commerce, Bengaluru City University | CGPA: 7.08 / 10 | First Class with Distinction

TECHNICAL SKILLS

- Languages & Web: Java, Python, C, SQL, JavaScript, React, Node.js/Express, MongoDB, Flutter, HTML/CSS, REST APIs
- ML/Data: XGBoost, Random Forest, Scikit-learn, TF-IDF, NLP/Sentiment Analysis, Power BI, Tableau, DAX
- Tools & Fundamentals: Docker, Git/GitHub, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
- Practices: Agile Development, Software Testing, Project Management, Research Methodology

PROJECTS

Adaptive Multi-Modal Cyber Deception Detection System

MCA Major Project (Solo) — Grade A+

github.com/mohitrajjj/AMCDDS-

- Independently built CyberShield v2.0, an end-to-end threat-intelligence platform (FastAPI/Python, React, SQLite, Docker) combining 4 ML modules: an XGBoost + Random Forest voting classifier for phishing URLs, a TF-IDF + XGBoost model for job-fraud detection, an Error Level Analysis/DCT/FFT pipeline with Grad-CAM for image-manipulation detection, and an Isolation Forest anomaly detector.
- Designed a weighted Risk Fusion Engine with LIME/SHAP explainability, batch scanning, and a live performance/history dashboard; achieved 96.4% accuracy (0.993 AUC-ROC) on phishing-URL, 94.2% on job-fraud, and 91.7% on image-forgery detection, with sub-2.1s inference.

HireSync – Full-Stack Job Application & Recruitment Tracking Platform

github.com/mohitrajjj/hiresync

- Built a MERN-stack platform (React, Node.js/Express, MongoDB) with JWT authentication, job postings, resume upload/storage, and a Recharts analytics dashboard, enabling recruiters to track and filter applicant status in real time instead of manual spreadsheets.

SpendSense – Personal Finance Tracker (Flutter PWA)

github.com/mohitrajjj/SpendSense-flutter

- Built a Flutter Progressive Web App for expense tracking with Provider state management, fl_chart analytics, and PDF export, installable with no app-store download and usable offline via local browser storage.

FocusSense – Real-Time Focus & Attention Tracking (Minor Project)

github.com/mohitrajjj/Minorproject

- Built a real-time focus/attention tracking system using MediaPipe facial-landmark and head-pose analysis feeding a CNN + LSTM classifier, with a Flask dashboard for live multi-student monitoring, SQLite session logging, and CSV/PDF report export.

Business Intelligence Dashboards – Power BI & Tableau

RVCE Course Certificate (MCA224B2)

- Built Power BI and Tableau dashboards analyzing sales, profitability, regional performance, and customer-level insights as part of MCA coursework.

EXPERIENCE

Research Intern — Centre of Competence in Visual Computing, RVCE

Aug 2025 – Sep 2025 (6 wks)

github.com/mohitrajjj/toxic-app

- Built the Toxicity Filter Application, a multilingual (English/Hindi/Hinglish) real-time content-moderation system combining lexicon-based detection, fuzzy string matching, and sentiment polarity scoring (Node.js, Python, Docker) to flag and sanitize harmful text as it's entered, reducing the need for manual moderation review; internship with industry partner Bhargawa Info Tech Solutions. Graded A+.

Intern — Airobosoft, Bengaluru

Mar 2024 – Apr 2024

- Contributed to data collection and analysis for an AI & robotics research community as part of the BCA internship program.

CERTIFICATIONS & ACHIEVEMENTS

- Research Methodology — NPTEL, IIT Madras (Elite, 71% score, Jan–Mar 2025)
- PL-300 Exam Preparation Course: Microsoft Power BI Data Analyst — Udemy (Jun 2025)
- React with Redux & NodeJS/MongoDB Case Studies — Infosys Springboard (Dec 2025)
- Technical Seminar "Brain-Computer Interfaces: The Future of Human-Machine Communication" — graded O (Outstanding)
