PROFESSIONAL SUMMARY

MCA graduate from RV College of Engineering (CGPA 7.90, First Class with Distinction), with hands-on experience across full-stack development, machine learning, and data analytics. I like taking an idea from concept to a working product — from ML-driven platforms to full-stack web and mobile apps. Proficient in Python, SQL, React, and Node.js. Looking for an entry-level role in software development, data analytics, or business intelligence.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

RV College of Engineering, Bengaluru (VTU) | CGPA: 7.90 / 10 | First Class with Distinction

Bachelor of Computer Applications (BCA)

2021 – 2024

M.S. Ramaiah College of Arts, Science & Commerce, Bengaluru City University | CGPA: 7.08 / 10 | First Class with Distinction

TECHNICAL SKILLS

- Languages & Web: Python, C, SQL, JavaScript, React, Node.js/Express, MongoDB, Flutter, HTML/CSS, REST APIs
- ML/Data: XGBoost, Random Forest, Scikit-learn, TF-IDF, PyTorch, Transformers (BERT), Power BI, Tableau, DAX
- Tools & Fundamentals: Docker, Git/GitHub, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
- Practices: Agile Development, Software Testing, Project Management, Research Methodology

PROJECTS

Adaptive Multi-Modal Cyber Deception Detection System

github.com/mohitrajj/CyberShield

- MCA Major Project (Solo) — Grade A+. Independently built CyberShield v2.0, an end-to-end threat-intelligence platform (FastAPI/Python, React, SQLite, Docker) combining 4 ML modules: an XGBoost + Random Forest voting classifier for phishing URLs, a TF-IDF + XGBoost model for job-fraud detection, an Error Level Analysis/DCT/FFT pipeline with Grad-CAM for image-manipulation detection, and an Isolation Forest anomaly detector.
- Designed a weighted Risk Fusion Engine with LIME/SHAP explainability, batch scanning, and a live performance/history dashboard; achieved 96.4% accuracy (0.993 AUC-ROC) on phishing-URL, 94.2% on job-fraud, and 91.7% on image-forgery detection, with sub-2.1s inference.

HireSync – Full-Stack Job Application & Recruitment Tracking Platform

github.com/mohitrajj/HireSync

- Developed a MERN-stack platform (React, Node.js/Express, MongoDB) with JWT authentication, job postings, resume upload/storage, and a Recharts analytics dashboard, enabling recruiters to track and filter applicant status in real time instead of manual spreadsheets. Set up CI/CD via GitHub Actions with automated Jest/Vitest test coverage across backend and frontend.

SpendSense – Personal Finance Tracker (Flutter PWA)

github.com/mohitrajj/SpendSense-flutter

- Created a Flutter Progressive Web App for expense tracking with Provider state management, fl_chart analytics, and PDF export, installable with no app-store download and usable offline via local browser storage.

Canteeno – Canteen Management System (React)

github.com/mohitrajj/Canteeno

- Built a React web app for canteen ordering with a full order-to-wallet flow: employees browse a categorized menu, add items to a cart, and have the total deducted automatically from a wallet balance, with complete order history for both employees and admins. Includes an admin portal for menu/employee management and live stats on orders, revenue, and wallet funds — no backend, fully persisted via localStorage.

EXPERIENCE

Research Intern — Centre of Competence in Visual Computing, RVCE

Aug 2025 – Sep 2025 (6 wks)

- Built a toxicity detection web app (Flask, PyTorch, HuggingFace Transformers) using a fine-tuned BERT model trained on the Civil Comments dataset to classify text across 6 categories (toxicity, obscene, threat, insult, identity attack, etc.). Added batch analysis with file import, a rate-limited REST API, and rule-based rephrase suggestions with before/after comparison; internship with industry partner Bhargawa Info Tech Solutions. Graded A+.

Intern — Airobosoft, Bengaluru

Mar 2024 – Apr 2024

- Learned full-stack development fundamentals in a professional team setting; built Meowchi, a full-stack e-commerce website (HTML/CSS/JavaScript, Firebase), as hands-on internship training.

CERTIFICATIONS & ACHIEVEMENTS

- Research Methodology — NPTEL, IIT Madras (Elite, 71% score, Jan–Mar 2025)
- PL-300 Cert Prep: Microsoft Power BI Data Analyst — Udemy (Jun 2025)
- React with Redux & NodeJS/MongoDB Case Studies — Infosys Springboard (Dec 2025)
- Technical Seminar "Brain-Computer Interfaces: The Future of Human-Machine Communication" — graded O (Outstanding)
